

# The Rim

**Daniel Hancox**

*Digital Photography*

The landscape of the Scenic Rim appears comfortingly static, an unchanging part of the identity of the entire region and the people that live here.

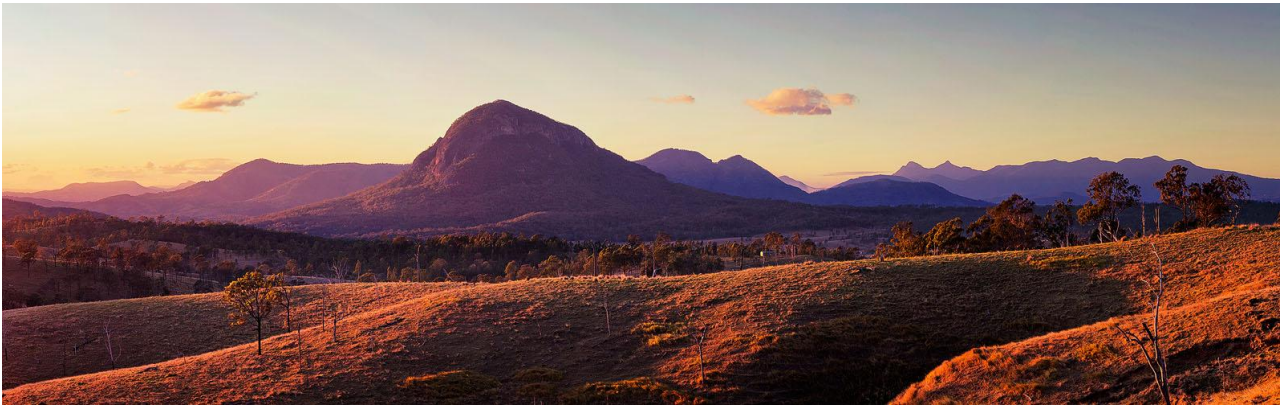

But it is also incredibly malleable and dynamic, once being home to two of the three shield volcanos that make up Australia's Green Cauldron.

This region is now a contrast of open spaces punctuated by monumental remnants of its volcanic past, forged by millennia of weathering and erosion.
